# Burpee's Early- or Winter-Flowering Spencer or Orchid Sweet Peas

The HOUSE OF BURPEE is recognized the world over as American Headquarters for Sweet Peas. Burpee was the pioneer Sweet Pea grower in America and has held a leading position through all the years when first the "Grandifloras" and later the "Spencers" presented the world with their multitude of new colors—bright scarlet and vermillion; odd maroon shades; delicate tints of pink, cream pink, blush, lavender, amber, salmon; bicolor and striped combinations.

It is with the greatest confidence that we offer our New Early- or Winter-Flowering Spencer Sweet Peas, among which are included a number of distinct and most desirable colors in this popular flower—colors which will be in ready demand, their inclusion increasing the sales value of any consignment.

Realizing the great importance of, and the necessity for, improvement in the early-flowering type of Sweet Peas, we began our work in crossing the Spencer Sweet Peas with the Burpee Early-Flowering Grandifloras in the summer of 1909. Later we used that magnificent Australian variety, "Yarrowa," in many of our crosses, and also the best of our seedlings with the finest introductions of the Summer-Flowering Spencers. We have left nothing undone still further to improve Burpee's Early- or Winter-Flowering Spencers, and we have been rewarded with many magnificent new colors which we will offer to our friends as soon as we have sufficient stock.

For the year 1921 we have a number of outstanding novelties all developed on Burpee's Fordhook Farms in Pennsylvania and grown for crop on Burpee's Floradale Farms in California. These novelties are now offered to the florists. The complete Burpee list includes colors not offered by any other grower: colors which have been much wanted in this important class of Sweet Peas. For instance, our blues and lavenders are a long march ahead of anything hitherto offered in these colors. We also point with pride to our pink, cream

pink and cerise sections. In white there is none to compare in size, shape, texture, purity of color, and length of stem with Improved Snowstorm. Needless to say, the stocks of all our Sweet Peas are properly "trued."

We offer seeds listed, subject to prior sale, at the prices quoted postpaid to your door. Our terms are cash with order, unless you are personally known to us or in a business where we can learn your financial standing from the commercial agencies. Small shipments may be sent by Parcel Post C. O. D. You may remit, at our risk, by post-office money order, check, draft, or express order.

Please be careful to sign your name and give your complete address on every order and letter sent us.

Your orders and inquiries will have our prompt and careful attention.

Sincerely yours,

W. ATLEE BURPEE CO.

# Glitters (Burpee's)

## Burpee's New Early- or Winter-Flowering Spencer Sweet Pea

**Glitters**  
Burpee's New  
Early- or Winter-  
Flowering  
Spencer Sweet Pea

It is giving this novelty scant praise when we say it is a "great flower." No variety we know of approaches GLITTERS in richness, brightness, and live fire effect. It is unique and outstanding, far ahead of all other orange-colored Sweet Peas. It *glitters* and scintillates, with a fire-like sheen radiating over the flowers. Magnificent by day, its color under artificial light is startling.

We can only attempt to describe its flaming hue—to be fully appreciated it must be seen. The standard is a bright, fiery orange, and the wings are deep orange. The enormous flowers are of substantial texture, and hold up well after cutting. The large size of the individual flowers and the bold waving of standard and wings are well shown in our life-size illustration. The flowers are artistically placed, usually in fours, on a long and strong stem. The sprays are majestic, but graceful withal, and make up into a most striking bunch. GLITTERS is a strong and vigorous grower, with healthy, deep green foliage, blooming profusely and continuously. All up-to-date florists will want this novelty.  $\frac{1}{4}$  oz. \$3.00;  $\frac{1}{2}$  oz. \$5.75; oz. \$10.00, postpaid.

# 3360 Flamingo (Burpee's)

## Burpee's New Early- or Winter-Flowering Spencer Sweet Pea

This is a distinct and charming variety, the color in particular being attractive and pleasing. The flowers are truly enormous in size, usually produced in threes and fours on very long, stiff stems. The broad and well-waved standard is light orange with a suffusion of bright salmon and the wings are a delicate shade of orange-pink. A bunch of FLAMINGO is of such rare and unique beauty that it is almost impossible to find words to properly describe it. It is a most charming combination of light orange, salmon and orange pink which blends into a

general effect of bright, light orange. The texture of the flowers is substantial, yet light enough to permit of the most graceful waving. FLAMINGO is a fine grower, with strong stems and rich green foliage and, above all, it produces its magnificent sprays in great profusion. The illustration, reproduced from a life-size photograph, taken on our FORDHOOK FARMS, gives an idea of the huge size of the flowers and their magnificent form. FLAMINGO will make a splendid commercial variety. Those growers who have seen it have already placed advance orders for it.

# Burpee's Early- or Winter-Flowering Spencer Sweet Peas

We give below a complete list of the Burpee varieties of Early- or Winter-Flowering Spencer Sweet Peas, arranged according to colors. With the exception of "Yarrowa," which is an Australian variety, these have all originated with us. In breeding the Burpee varieties of Early-Flowering Spencer Sweet Peas we have selected not only for desirable colors, but also for vigor and free blooming qualities. But the call for varieties suitable for growing in raised benches or houses where the head room is not more than five feet has prompted us to introduce the varieties Sweet Briar, Primrose Beauty, Rising Sun, and Sunburst, which are most profuse bloomers, and grow not more than five feet tall.

## WHITE

A vigorous grower, the immense flowers are invariably borne in fours on very long stems. This is the last word in white Sweet Peas. Awarded Certificate of Merit at the great International Show, New York, March 20, 1918.

We regret that, owing to short crops, we are unable to offer the two novelties, Glitters and Flamingo, at wholesale. As long as our stocks permit, we will fill orders at the florists' price, \$10.00 per ounce, but cannot supply more than 8 ounces to any one customer.

For trade prices on other flower seeds see Burpee's Red List for 1920.

Prices quoted above are f. o. b. Philadelphia, bags extra at cost. Unless otherwise quoted, ounces will be supplied at ¼ the pound prices and quarter-pounds at ½ the pound prices. Half-pounds will be supplied at the pound rates.

Terms of payment: Due net 60 days, 2% discount for cash within 10 days from date of invoice.

# Burpee-Quality Flower Seeds for Florists

Flower seeds of the finest varieties and highest quality have always been a specialty with Burpee. FLORADALE FARMS have come to be known as the California Home of Flowers and, in addition to the large areas devoted there to the production of flower seeds, we grow annually many acres of flowers at FORDHOOK FARMS in Pennsylvania and SUNNYBROOK FARMS in New Jersey. Our stocks of the flower seeds listed below are worthy of the particular attention of Florists.
